

# AI Portfolio Prioritisation Matrix

PURPOSE

Compare initiatives at portfolio level and expose trade-offs across investment and capacity.

DECISION IT SERVES

Where should investment and capacity be allocated?

1 Initiative scoring

| Initiative | Strategic fit | Value | Feasibility | Risk | Urgency | Capacity | Dependencies | Portfolio role | Investment ask | Decision |
|------------|---------------|-------|-------------|------|---------|----------|--------------|----------------|----------------|----------|
|            |               |       |             |      |         |          |              |                |                |          |
|            |               |       |             |      |         |          |              |                |                |          |
|            |               |       |             |      |         |          |              |                |                |          |
|            |               |       |             |      |         |          |              |                |                |          |
|            |               |       |             |      |         |          |              |                |                |          |
|            |               |       |             |      |         |          |              |                |                |          |
|            |               |       |             |      |         |          |              |                |                |          |
|            |               |       |             |      |         |          |              |                |                |          |
|            |               |       |             |      |         |          |              |                |                |          |
|            |               |       |             |      |         |          |              |                |                |          |

2 Portfolio trade-offs

| Trade-off | Option A | Option B | Impact | Decision required |
|-----------|----------|----------|--------|-------------------|
|           |          |          |        |                   |
|           |          |          |        |                   |
|           |          |          |        |                   |
|           |          |          |        |                   |
|           |          |          |        |                   |
|           |          |          |        |                   |
